DELCO-LIGHT

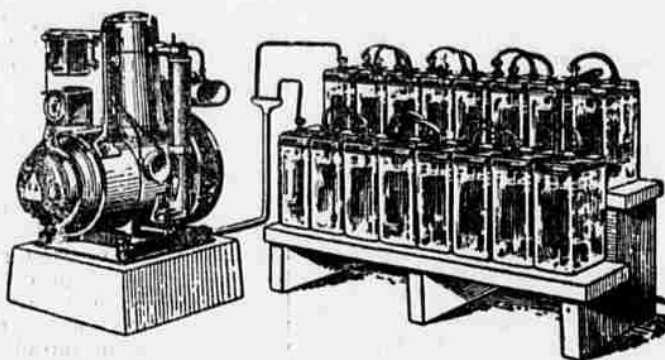

The Compact Electric Plant for Farms,
Stores, Country Homes, Etc.

On display at

The National Farmers' Exposition
Toledo—December 5th to 15th, 1917

It will furnish plenty of bright Electric
Light for your house and barn. It will
supply power to operate a water
system, churn, cream separator, milk-
ing machine, washing machine, etc.

DELCO-LIGHT increases farm efficiency.
It is a paying investment.

NOW FOR THE "FARMER SHOW"

Crowds Coming from Near and Far to
the Big "Land Expo" at Toledo.

All eyes are turned toward Toledo—
for the Farmers' Exposition is big
event of interest to all Ohio. And it
is "some show"—every minute filled
with interesting events. There is
nothing pertaining to the farm that
has been overlooked—tractors will be
demonstrated in actual operation.

The live stock surpasses any pre-
vious exhibit in this section, hogs,
poultry, sheep, cattle all the best types
and the blue ribbon winners. Modern
dairying shown, with forestry a close
second.

The electrical displays include
lighting systems, all manner of elec-
trical household goods and novelties
never before shown. Free movies and
free music, just one continuous round
of pleasure, education and sight see-
ing.

The U. S. government exhibits are
worth coming miles to see, as this
is a big display.

Electricity for Five Cents A Day

"It is impossible, or course, to say
definitely just what Delco-Light will
cost each individual. This will vary
with the amount of current used and
some people use more than others.

"I am able to state the usual cost
on the average farm," said Mr. E. H.
Walker, distributor. "This is about
five cents a day, and can be verified
by asking any Delco-Light user in this
vicinity."

Can you imagine anything else that
you could buy for five cents a day
that would give you anything like as
much comfort or help you half as
much in your work?

There are about 200 users of Delco-
Light ten miles of Toledo who can
testify that it greatly increases farm
efficiency. Labor is scarce and hard
to get even at high prices, but electric
power and light is always at your ser-
vice, and can be put to many uses
which will make farm work easier.

A Useful Gift—An Electric Iron

TURN THE TASK OF
IRONING INTO PLEASURE

Use an electric iron and it will
be done. No fire to make of
any kind. No heat in the room
except in the iron. You can
do the ironing out on the porch
if you want to. And there are
so many more good things
about it you must come and
see them. An electric iron saves
everything, including money.

All sorts of electric appliances.
